SEA
Cape Cod & Islands Scholarship

2013 Science at SEA Summer Seminar

SEA is proud to offer a FULL SCHOLARSHIP to a motivated high school student from Cape Cod or the Islands for participation in our 2013 Science at SEA program.

The Award
One full scholarship (covers tuition, room and board) will be awarded to the most outstanding applicant, based on academic achievements, other educational experiences, and financial need.

The Program
Science at SEA (SAS) is a 20-day program for high school sophomores, juniors, and seniors focusing on the coastal and offshore marine environment around Cape Cod, Massachusetts. The program includes a shore component on the SEA campus in Woods Hole and a sea component aboard SEA’s sailing research vessel, the SSV Corwith Cramer. During the shore component, students study the marine environment from a variety of perspectives —scientific, historical, literary, and nautical. This is an academic program complete with written assignments and tests. During the sea component, students study offshore oceanography, nautical science, while acting as members of the ships crew. Students are evaluated on achievement and effort.

Requirements
Year-round resident of Cape Cod or the Islands currently enrolled in high school. You may be at school elsewhere. Summer-only residents are not eligible.

To Apply
• Submit a complete application for Science at SEA:
  http://www.sea.edu/admissions/high_school_checklist
• Submit a brief letter (1 page maximum) to the scholarship committee explaining why you are deserving of this award
• Submit supporting parent’s 2012 (or 2011) tax return

Deadline: April 20, 2013
800-552-3633 x770
Need-based financial assistance is also available.
