Scientific Staff

Gary Jaroslow	Chief Scientist
Mary Engels	First Assistant Scientist
Cina Loarie	Second Assistant Scientist
Skye Moret	Third Assistant Scientist

Nautical Staff

Chris McGuire	Captain
Jeremy Law	Chief Mate
Justin Smith	Second Mate
Jullie Jackson	Third Mate
Jeremy Lucke	Engineer
Chris Wang	Steward

Students

Margaret E. Alferman	Boston University
Jaymievieve G. Ang	Stanford University
Dylan A. Armajani	Bard College
Philip F. Arnolds	Williams College
Rachel L. Beardsley	University of Denver
Elizabeth L. Crockett	Saint Mary's College
Kate E. DeBellis	University of Denver
Kathryn L. Dick	Smith College
Jessie A. Drechsel	Eckerd College
Rachel J. Greenough	Carleton College
Mackenzie A. Haberman	Barnard College
Peter D. Herman	Brown University
Nicole A. Klosterman	Northeastern University
Greg J. Moeller	Butler University
Stephanie A. Owens	Sewanee - University of the South
Christopher N. Reynolds	Colorado College
Astrid L. Rodriguez	Bowdoin College
Lindsey Rutherford	Santa Clara University
Thomas W. Summers	Rollins College
Jessica L. Travers	Eastern Nazarene College
Eleanor D. Tripp	Barnard College

Data Description

This cruise report provides a record of data collected aboard the SSV *Corwith Cramer* during Cruise C-201 during October and November of 2005. The cruise track transected the North Atlantic Ocean from Woods Hole, MA to St. Croix, USVI (Fig. 1). The sea-going program is an extension of Sea Education Association (SEA) courses conducted for six weeks on shore in Woods Hole and emphasizes the application of theoretical concepts to the study of the oceans. Oceanographic research conducted during Cruise C-201 involved extensive data collection for individual student projects (Table 1) and ongoing SEA research programs. The student projects focused on current scientific problems in physical, chemical, biological, geological, and environmental oceanography, and stressed the interdisciplinary nature of the applied science. In particular, the complex interaction of oceanic processes was emphasized by interdisciplinary, regional, and temporal comparative analyses of the various data sets collected. Student research papers are available on request from SEA.

During the cruise, samples or data were collected at 190 discrete oceanographic stations (Tables 2 and 3) in addition to continuously sampling water depth, sub-bottom acoustic profiling, Acoustic Doppler Current Profiles (ADCP) and flow-through sea surface temperature, salinity and *in-vivo* fluorescence. This report summarizes sea surface chemical properties (Table 3), subsurface physical, chemical and biological characteristics (Fig. 2, Tables 4 and 5), and surface sediment qualities (Table 6). Lengthy CTD, CHIRP, ADCP and flow-through data are not reported here. All unpublished data can be made available by arrangement with the SEA archivist (Contact information, p.2). The information contained in this report is not intended to represent final interpretation of the data and should not be excerpted or cited without written permission from SEA.

Gary E. Jaroslow
Chief Scientist
C-201

Figure 1. Cruise-track map for Cruise C-201 of the SSV *Corwith Cramer* from October 13 - November 20, 2005. The cruise began in Woods Hole, MA USA, made port stop in the Caribbean island of Carriacou, Grenadines and ended in St. Croix, USVI.

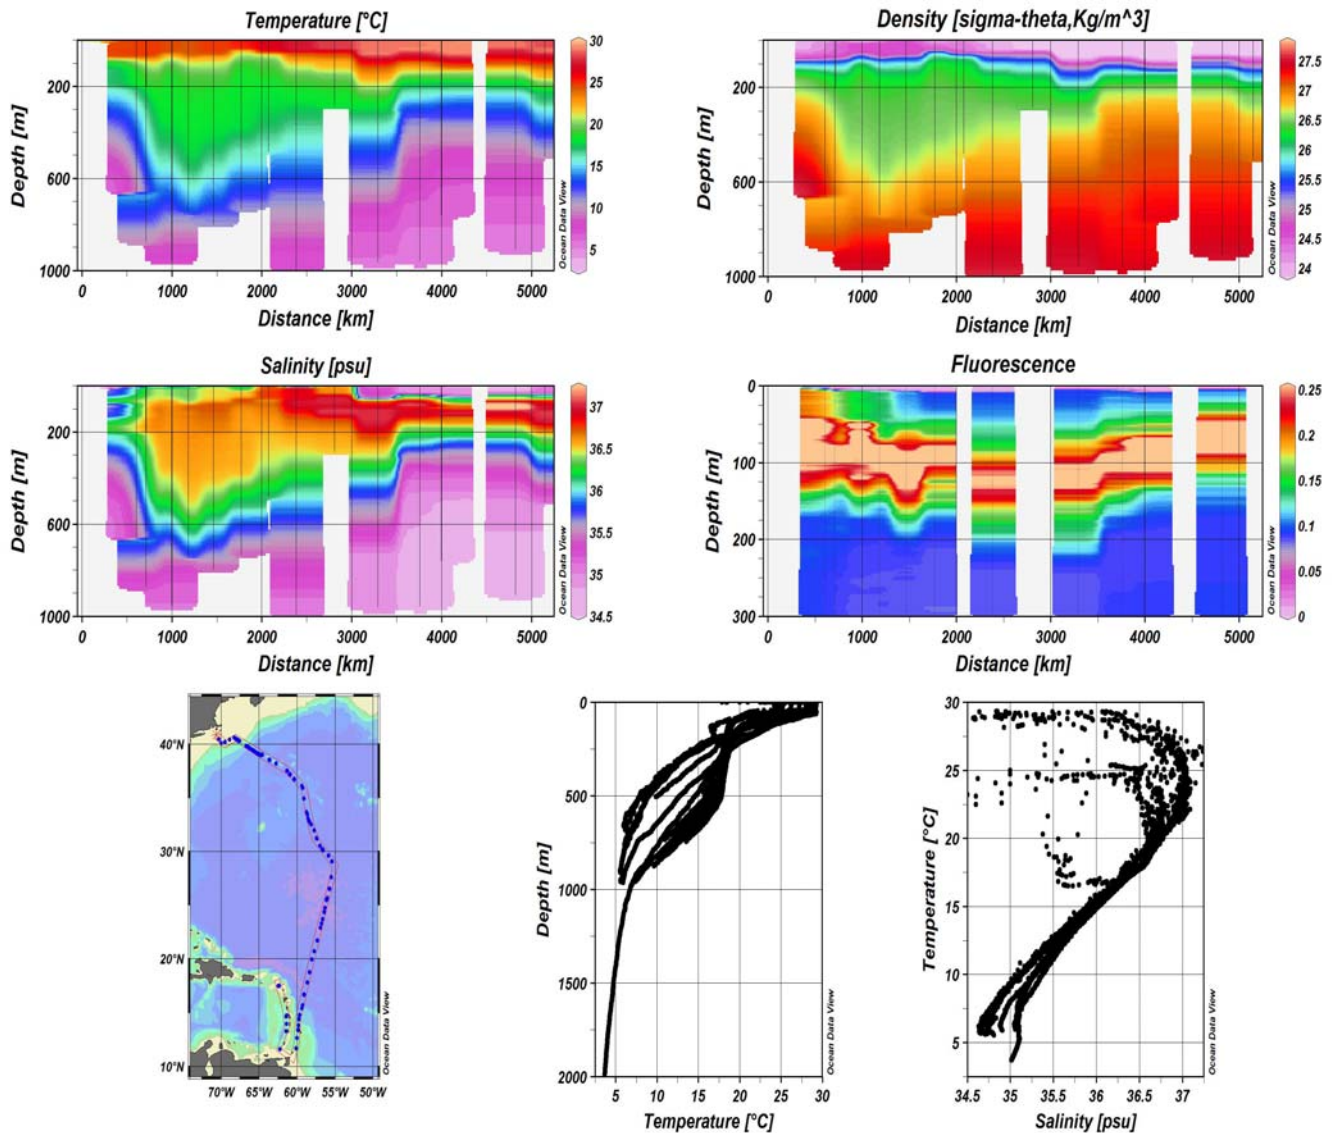

Figure 2. Data collected at CTD and surface stations located in map (lower left, stations shown by blue dots). Along-track water temperature, salinity, density and *in-vivo* relative fluorescence (top and middle sections). Plots of water-column temperature and temperature versus salinity (lower right).

Table 1. Student Research Projects

Title	Student Researcher(s)
The effect of eddy velocity structure on surface properties in the North Atlantic	Rachel Greenough Lindsey Rutherford
The effects of North Atlantic Oscillation variability on the formation and distribution of Eighteen-Degree Water in the Sargasso Sea from 1992 to 2005	Stephanie Owens
Effects of bacteria on the vertical distribution of phytoplankton with respect to nutrient presence in the Atlantic Ocean	Greg Moeller
The regional distribution of <i>Trichodesmium</i> throughout the North Atlantic Ocean and the effect that temperature, wind speed, salinity and nutrient concentration on the abundance.	Rachel Beardsley
A dinoflagellate survey across major oceanic fronts of the Northwest Atlantic	Jessica Drechsel
Variation in bioluminescence due to primary production in the Northern Atlantic Ocean	Jessica Travers
<i>Euthecosomatous pteropods</i> as an indicator species for climate variation	Margaret Alferman Christopher Reynolds
Seasonal distribution of <i>Halobates micans</i> in the Atlantic Ocean	Kate DeBellis
Distribution and composition of zooplankton patches within the North Atlantic Ocean	Mackenzie Haberman
The relationship between marine copepod size and the timing and direction of diel vertical migration	Philip Arnolds
Diel vertical migration of marine zooplankton: the relationship between population composition and variation of timing and velocity of migratory patterns	Elizabeth Crockett Eleanor Tripp
Dietary niche development and health of <i>Centrobranchus nigroocellatus</i> and <i>Gonichthys cocco</i> in the North Atlantic Ocean	Jaymievieve Ang
The relationship between myctophid diversity and depth: A regional comparison between the Northern and Southern Sargasso Sea	Tom Summers
Seasonal variation in siliciclastic terrigenous deposition in a tropical carbonate environment, Galleon's Passage and the Lesser Antilles island arc	Peter Herman Nicole Klosterman
Sediment transport mechanisms and deposition patterns in the Southeastern Caribbean	Kathryn Dick Astrid Rodriguez
The abundance and distribution of pelagic plastic within the N. Sargasso Sea, S. Sargasso Sea, and Subtropical Convergence Zone	Dylan Armajani
